PETITION

To the Honourable Speaker and Members of the Legislative Assembly of the New South Wales Parliament.

This Petition of residents of the State Electorate of Monaro and other certain citizens of New South Wales and the Australian Capital Territory brings to the attention of the House their objection to the proposed wind farm development for Molonglo Ridge. The proposed development is inappropriately sited on a prominent land feature in close proximity to residents' homes and will have a serious impact on residents' quality of life due to:

- Impairment of the visual amenity of the area
- Noise levels during construction and operation
- Nuisance features of wind turbines for nearby residents such as shadow and light flicker and electromagnetic interference with television and mobile phone reception.
- Detrimental health effects as a result of noise and other nuisance
- Reduced property values as a result of the above.
- Damage to the local environment by killing birds, destroying natural habitat for wildlife and scarring the landscape
- The proximity to a large number of houses

We the undersigned therefore ask the Legislative Assembly to intervene to prevent the development.
